

Resurrection Garden Instructions

You will need: A saucer for the base, a small terracotta pot or small yogurt container for the tomb, soil, grass seed, small stones, and a large stone for the entrance to the tomb.

Turn the small container on its side and decide where it will lie in your garden. Place some small stones inside around the opening of the "tomb". If you're using a small terracotta pot, use a spray bottle with water to moisten the pot, so the soil will stick to the surface. Place soil over the top of the "tomb" and fill the saucer halfway with soil. Spray the soil with water and then sprinkle on the grass seeds on top. Use the large rock to close the "tomb". Spray the grass seeds with water everyday. You may place the whole saucer inside a plastic bag to keep the grass seeds moist.

Over the next few weeks, new life will cover the garden. On Easter morning, open the tomb and say, "Christ is risen!"

What do you want to add to your resurrection garden? A cross? A flower? A butterfly?
